

Lactation Management Courses

These courses received recognition through the Lactation Education Accreditation and Approval Review Committee (LEAARC). LEAARC Approval is voluntary and provides a reliable indicator of educational quality to employers, insurers, counselors, educators, governmental officials, and the public, based on the fact that the course provider adheres to established criteria and standards of the profession. LEAARC Approved courses offer 90 hours of didactic instruction, which meets the IBLCE® requirement for lactation education. The *Criteria for Lactation Course Approval* are posted on the LEAARC website.

LEAARC is sponsored by the International Lactation Consultant Association® (ILCA®) and the International Board of Lactation Consultant Examiners® (IBLCE®). LEAARC and its sponsors cooperate to establish, maintain and promote appropriate standards of quality for breastfeeding and lactation education and to provide recognition for programs and courses that meet or exceed the minimum criteria. In addition to granting course recognition, LEAARC also serves in cooperation with the Commission on Accreditation of Allied Health Education Programs (CAAHEP) for official recognition of academic lactation programs that meet IBLCE Pathway 2 criteria.

Presents a comprehensive presentation of the skills and knowledge needed for evidence-based professional lactation consultant practice. Increases the knowledge and skill of perinatal health professionals, and helps prepare candidates for the examination sponsored by the International Board of Lactation Consultant Examiners. Six full days of instruction conclude with an examination simulation to help identify strengths and gaps in skill and knowledge areas. Interactive activities, clinical slides and videos, and skill-building techniques create a uniquely warm and supportive learning environment. This course was the first lactation course designed on the *IBLCE Exam Blueprint*, and is the longest-running course of its kind.

The Centre for Breastfeeding Education offers programs and educational courses for those wishing to become an IBCLC and all healthcare professionals working with breastfeeding dyads. We also provide continuing education for those who are already IBCLCs. Our faculty consists of a multi-disciplinary team who are specialized in their respective areas of lactation medicine. Our comprehensive training programs, which are based on current and evidence based research, include a didactic learning component and a practical component (a critical element of the Institute) that fosters a unique level of competency when caring for the breastfeeding dyad. Please visit our website for program descriptions.

Deborah Robertson, IBCLC

Breastfeeding Specialist Course
120 hours
Approved since October 5, 2010

Contact: Deborah Robertson BEd (Hons), IBCLC
Address: 34 Rochester Avenue
Rochester, Kent ME1 2DW, UK
Phone: +01-63-48-14221
Email: deborahruk@yahoo.co.uk
Website: www.breastfeedingspecialist.com

This course comprises 12 days, one Saturday per month in London, done in any order and across one or more year. Teaching is a combination of lecture, game, video, discussion, handouts, practical demonstration, drama, case studies and skills practice, all linking theory to everyday work in lactation. We end with multiple choice questions on the day's topic, thus building exam-taking skills. Homework is set (consisting of reading from the set book, tests, reflective writing and preparing client or staff teaching material) which need to be submitted for assessment in the following month. 'Study buddies' is encouraged through our online group.

Douglas College

Breastfeeding Course for Health Care Providers
136 hours — Hybrid distance learning
Approved since March 1, 2011

Contact: Ivette Musso, RN, MN, BSN, IBCLC
Address: 1250 Pinetree Way
Coquitlam, BC V3B 7X3, CANADA
Phone: 604 -777-6463
Email: mussoi@douglascollege.ca

This hybrid course provides comprehensive information in breastfeeding counseling and lactation theory. The course is intended for health care providers and health care provider students. It offers the tools needed to help participants support, counsel and empower families to reach their breastfeeding goals. Students will learn how to manage common breastfeeding concerns and challenges and develop a well-rounded and evidence-informed understanding of current optimal infant feeding practices. This course includes 3 mandatory face-to-face classes where students will practice and apply what they have learned during the interactive lectures. Participants will also attend various clinical observational experiences as a way to consolidate their learning by observing the application of theory to practice in real life settings.

Health e-Learning has been providing high quality online education since 1990 and as of March 5, 2013 is managed by the International Institute of Human Lactation Inc. By studying our courses online, you can interact with the course, your tutor, and other students. Links to other quality websites, journal articles, and online references, help you to have a broad understanding of the topics. Case studies, videos, and self-test quizzes are provided to help focus your learning. The forums add an extra dimension to learning as our course facilitators draw your attention to new research, points of interest, and clinical case studies. The forums also provide an opportunity for you to ask and respond to questions related to your courses. You'll be fully engaged learning online with Health e-Learning.

The IHL-IILH was established to expand the original Montréal Institute for Lactation Consultants (MILC) lactation education program (founded in 2002) internationally. Our current program is offered in French and English, 2 – 4 times a year, consisting of 14 courses over 7 months (September to February) and a practice exam with review. In addition to lectures/discussion/case studies, there is opportunity for a clinical rotation at a tertiary level hospital-based breastfeeding clinic. Our instructors provide a comprehensive, evidence-based, overview, covering areas of the *IBLCE Exam Blueprint*, thereby preparing candidates with knowledge and skills to sit the exam, toward obtaining the IBCLC credential.

This course is 90 CERPs, encompassing all areas of the IBLCE Exam Blueprint. It is a stepping stone to becoming an IBCLC. The goal is to prepare you to practice hands-on as a lactation specialist. You will learn how to assess, evaluate, counsel, and treat the breastfeeding dyad. These valuable clinical skills and exposure to current research on lactation will make you a desirable practitioner. Enjoy three instructors who come from varied work settings and who continue to work with mothers and babies. Various teaching methods, lots of clinical slides, and plenty of humor make the class day go quickly.

This comprehensive on-line lactation management course is taught by 15+ experienced and committed lactation consultants, authors, researchers and educators. The course includes an in-depth discussion of all the topics in the IBLCE Detailed Content Outline for the Certification Exam. Instruction is all evidence based and updated continuously as new information becomes available. Case studies enrich the understanding of didactic learning. Students listen to interviews with lactation consultants practicing in a variety of clinical practice settings for insight into actual work experience. This course has been in continuous operation since 1990 and has trained over 6,000 lactation consultants. This course provides a Breastfeeding Specialist certificate upon completion to be used as a stepping stone to IBLCE certification.

The Grow Our Own Lactation Consultant course is a 15 day, monthly or bi-monthly, 105 hour didactic lactation course which follows the *IBLCE Exam Blueprint*. Evidence based education is at a pace allowing for critical clinical experience, completion of assignments and course work. This course was birthed out of a need for more IBCLCs based in the Public Health setting including the WIC program. The Grow Our Own course offers a collaborative learning environment for WIC staff, Hospital RNs, La Leche League Leaders and Community Health workers.
